

The Gospel According to Jake99

In the beginning ...

Where we are now is where we are supposed to be. That does not mean that the methods that got us here were the best ones. The wars whether they be military or sales have brought us the abilities we needed to be able to use the simple system referred to in the bible. So with all the believers out there why is no one willing to change to the simple system? The ways of this world must change for the terrorism and wars to stop, it says so in the bible. It amazes me that there are so many patriots and so few believers of the truth and the way.

I don't claim to be god I claim to be the closest person to him. He uses me to fulfill prophecies and has been doing so all of my life(50 years). Peace and prosperity has been my game and it took many verbal wars to win. God approves of and directs me in the same way he did Jesus. My way is not your way its the way of the bible and I have to assume I am the only one that tried any part of it. The simple system is the one where you cannot own anything but you can use everything because we all own everything. Common needs are free and luxuries are earned. It solves every problem the earth has generated in just a few minutes. Use and distribute all the technology you have invented to properly manage the resources we have. The manpower and materials

that are wasted by buying, selling and advertising and banking are enormous and those same resources would go along way towards building all the things you want instead. Get rid of the possession lawyers and the insurance companies. Do you know how many houses you could build with the armies and office workers you have instead of fighting over everything. Stop fighting and selling its a waste of time and energy and its dangerous. And by the way I have been in court many times on many matters that dont seem to matter to anyone else. I hope to one day see you in court on the matter of possession I claim it is illegal. I see many Bush followers here, lets see he wants to gamble, kill, pollute and raise the retirement age to 70 not to mention run an ownership society. That philosophy will get you a war everytime as it has.

Viscious asked me to come here so you too could tear me apart. I merely accepted his challenge, he said smart people were posting here. I am glad he posted what I have said in other forums. The only statement that is misconstrued is probably because I worded it poorly. God and whoever or whatever he is and Jesus who I say that I am the same as is who I am. I am is a man that god uses but that does not make me God. My words are not even his words but they might be and

my success and experience speaks volumes that no one else can claim. I can fix anything and yet I have very little formal education, which is why major companies have given me the ball over the educated ones. I don't care about sentence structure its the content that counts.

Drop the english lesson it has no bearing on anything, my education is a bit different than yours and alot more useful. The bible is not worded as you speak. My 6 siblings finished top end listening to your teachers and I consider some of them totally misguided. The bible is totally accurate on many revelations if not all depending on how you look at it and the system for living in peace is one of use not ownership. That means we each own every atom of this world and thus you have to run a use type system, legally. You dont have the right to restrict me from what is mine, take down your walls. Because if you don't the wars that have been raging since the beginning of time will continue till the end of time. Recycle all the weapons of mass destrtruction and turn them into building materials. I would say that steel reinforced homes accross hurricane alley would be a good start before the winds blow you down again. The islands and coast lines are being decimated while the work force fires bullits at each other and burns up all the oil,etc. Its time for the buying and selling between each other to come to an end. Free basics, purchase luxuries by earning them.

What companies have I been a leader for: The US Marines as the night shift supervisor for Harrier ordnance in Cherry Point and Yuma (3 different squadrons). I also had leadership roles at Parris Island as first squad leader, 29 Palms as barracks commander, Memphis as for-

mation leader and Rosevelt roads PR as ordnance team leader. It was a quick 4 years and I spent the last year and a half on crutches after being hurt in a game of football. I was the quarterback for the squadron touch football team 4/0 , averaged 28 points a game, league high in every catagory as I hear. Leading the league has always been easy for myself and my 6 siblings in every sport. I also lost to the best straight pool player I ever saw in the finals at 29 Palms, he made over 60 balls on his first turn and beat me to 200 pretty quick. And I hustled pool on the strip in San Diego while on crutches at the Naval hospital after an operation that left a 8 in scar at my knee. I am a partially disabled Veteran but that just means my Tennis game is not what it once was.

Continental baking, ITT Continental baking, Ralston Purina and Interstate bakeries, all one time owners of Hostess Cake and Wonder Bread during my 21 years. In my spare time while acting as a production Superintendent I redesigned or modified every work area. Thats concept and design as well as overseeing the engineering projects. And I identified mechanical problems as well as all other problems in the 5 facilities I managed and resolved about a thousand ongoing problems permanently. Did I mention that I finished last in my high school class of 450 at one of the best schools in the US (Amherst Central Jr and Sr high Amherst NY). The first shall be last and the last shall be first applies here.

And during my leadership positions I was court martialed twice for communicating threats, but neither ended up as such and I only recieved a suspended bust from Corporal to lance Corporal which was just a warning. I would

have challenged that decision but you have few rights in the military. They wanted me to be a warrant officer from the start but I chose to stand against them instead. If you threaten me you get threatened back to the degree that I am allowed by law. I don't take lightly to bullies and I take them on immediately and legally. The same is true of the judicial system which has challenged and lost to me on many occasions. It seems that legally my threats were legal and justified and theirs were not, I say it's an obligation to stand against such criminals. I have had much experience in legal matters with the Teamsters, Bakery Confectionary and Tobacco as well as the Machinists and Office workers unions. I lost on a speeding ticket once but they cheated and I have won on several traffic offenses in court. Not once did I lose to a union when I pushed an issue, and I pushed many times in and out of court. Fast? This is just the tip of the iceberg as they say. You want proof I will send it to you. I am not a computer wiz although some believe that I am so I can fax a few things that can reference what I say is true. And I don't play Starcraft but it sounds like a good computer game. Is there a grammar and spell check here or am I at the mercy of the educated ones? Just another system that needs to be fixed if you ask me. Nothing I hate worse than finger pointers and scoffers. It's time to fix this world not blame each other and criticize things that do not matter. Give me the tools and I will give you a much better product as I always have.

Interstate Bakeries wanted me to be the director of operations, I turned them down and took on the judicial system instead.

I would be happy to let a senior

monitor research what I say to be true about who I am, and what I have done and I would be happy to give you names of people who will verify it. I don't stay in touch with Marines from long ago but high level business colleagues are available as references. And I have court docs that clearly state how easily I manipulate and execute prophecies while on trial at the same time. This world's best lawyers and doctors have failed many times to find fault in my mental state or prosecute me for events I admitted to and they broke the law many times along the way. You may not like my communication skills but several huge facilities and big companies followed my extensive instructions verbatim and we did not fail. I ran departments of about 200 and I had another 100 in support departments. Every minute over 21 years was documented in detail and I led the company in every category from start to finish.

I am for democracy but I would socialize the basic human needs so the crime wave would stop and the stress level would diminish. It's a lot better to feed, shelter and clothe a person for free than it is to feed them in jail for stealing the basics. Most crimes are as a result of not having basic needs met. And everyone worries about how they will survive which is a poor way to achieve peace. Do I have a perfect plan, yes and no but I can get the world on track to near perfection pretty quick just as I did in the work force in several big US cities. I made very few mistakes and they were small as I redesigned much of a company that was failing just as this world is. They ended up exactly as I said they would and it kept them in business and brought forth peace and prosperity. I want to give the work force a cell phone

that helps to schedule them and credit them for work. But what I wont sell is land because it should be used in the best manner possible according to experts. Protect the resorses by using them wisely and we will have plenty to go around. If you are living at the bot-tom of an active volcano I want to relo-cate you and use the land for farming and recreation so when the lava comes it will be easy to escape and it wrecks simple things not lives. Get the retail shops off the beach so if a tsunami comes what is left in its wake is just water and a few floating beach chairs. Dont let the natural events of the earth wreak havok.

I am not an e-mail expert or a en-glish major but I can and have done all the important things that no one else has ever done. That is the fail safe mechanisum that absolutly iden-tifies the real christ. Jesus spoke in ways that were strange and many said he was nuts but look at what he did which was nowhere close to what I have done.

Listen what I am telling you is, that however strange you may think that I am, the things that I have done are way beyond what any man or woman has ever done. I dont use your sys-tems the way you do, I cut through the red tape and barriers that stand in your way. Judging by the way you wish to destroy me it is difficult to post names of people you could harrass for all to see. What I am looking for is a wise man who looks at things logically and factually because that is what I would present. Would my references say weird things about me, absolutly but they will also tell you of what I did while I was being unusual. Unusual success and unusual methods brought unusual profits and peace in the work

place. Continental Baking aka Inter-state bakeries as a production super-visor or superintendent in Buffalo NY, Natick Ma., Cleveland Oh and techni-cal assistance and design engineering in East Brunswick NJ and Philadelphia Pa. Many of the top level managers in that company have worked at my side for at least a decade and signed off on the numerous efficiency projects I designed. I just dont want to have them pestered by just anyone. If you are serious about researching the crazy things that I say then its done privately. Many of the finest doctors in the US have given me a clean bill of mental health I am just different. They have had me in court and behind bars many times over what I write to them and have yet to be able to find a doctor that says I am nuts. I have run every gauntlet you have and I dont have a scratch on me.

He goes by assassinx as well and I told him about his assassination in another forum. Grassy knoll, back and to the left, something like that.

If you want me to leave I will but you should listen to the man who speaks in tongues. I have never led anyone astray and all of my leadership ended in prosperity for all.

Basics are food, shelter, clothing and medical care. Its not lobsters, diamond necklaces and world travel. If you work your life sytle improves much quicker than if you dont. Each time you restict someone from a natural resorse through ownership you start a war of pricing that is very complicated. I suggest you manage the resorses as experts in the field recommend rather than let some small business distribute and missuse resorses. All that packaging and ad-vertising is wasteful now that the world can streamline the distribution process

with technology. This system inks up everything with logos and advertisements throughout the environment. Its a waste of manpower and materials which is the reason that the important things do not get done.

There seems to be a few who wish to hear what I have to say and a few who think they can stay the course and get somewhere new.

I cannot possibly answer every question and I am not sure I even want to. Most of the writers here seem ok with the ways things are and you should just move on. If on the other hand some of you wish to hear me out without all the hateful remarks then I will continue to respond. Yes I stand against your way of life and I recommend a combination of several systems to achieve peace and prosperity. Socialism for the basics, communism for land ownership and capitalism for work effort. Implants can only work in a non violent system at which time I highly recommend them. It takes the mystery out of what happened to people and reveals their history to health care providers. We have all the technology that we need to solve every problem this world has I see no reason why we should not distribute such advantages. Internet computers and cell phones make life much easier but most cannot afford it so give it away for free and you wont need to drive children to school they can learn at home. And I do have a cure for cancer it is called an end to stress in the home at work and at play. I love the beach and I want to use it in the best way possible I leave that decision up to engineers and scientists what to build there but it would not be a flea market. Each time you restrict a person from a resource with lines on the map you start a war which is why I do not approve of

ownership. What gives you the right to restrict a persons movement on the earth? That is one of the reasons why I see you in court so often. It may take a lawyer at my side to present my point but I demolish your best lawyers and judges in court every time. Judge Daniel Winslow is the senior advisor to the governor of Massachusetts and I have stood against and defeated him in court about 8 times and I took on the rest of his band of organized criminals at least another 10 times. Is ti a waste of taxpayers money to defend criminals that call themselves honorable. They cheat, lie, violate laws, wreck homes and steal constantly and no one tries to stop them but me. If you have a lawyer out there in your so called intellectual forum please research Wrentham Ma. VS James Murphy Dkt 9857cr2993 and 9857cr2988 they are both trials at the millenium that ensued as a result of threats that I countered agaist your evil system. What do I look like a secretary. I have done many, many things that no other person can do regardless of whether you think it was important. You think a banker is important and I say currency is dirty and heavy. I want to automatic banking and go electronic and offer your wasteful pencil pushers a real job. Sorry I dont know how to write in word and post in here. Why dont you have a spell and grammer check? Too lazy or not enough manpower? Either way I stand against leaving people to work without the proper tools. Its the same as the computer and phone thing for all at no charge.

What I am trying to say is that if you take ownership out of the equation you will become vastly more efficient than if you continue to sell between yourselves. Nothing is less ef-

efficient than a small business which is why 9 out of 10 of them in the US fail in the first 5 years. Why would you put people through such a mathematical failure and then try to encourage more of it. Ownership is a waste of manpower and resources. Earn the right to use things based on labor effort only. I say the selling of resources is not just ethically illegal its the core of all of mankind's problems and its totally illegal. Just because that is what has run the world does not mean it is what should run the world. I stand against western civilization because it is complex and wasteful. I love the products it generated but we cannot allow that system to spread to the rest of the world. If it is that wasteful now with this many people, it will be much worse as population rises and terrorism continues. Just how badly do you want to strip the world of its fruit and hurt its people before christ comes to stand against you? Enough of the trade wars, distribute on a global level and get super efficient instead of super inefficient. Its a sharing thing that you need to run and it should be democratic. War whether it be military or trade ends up in every home and I stand against using manpower and resources to wage it. Every ownership is a line on the map that is defended with much effort, I just want to use that effort doing productive things instead. You seem to want to work hard and I want to work smart. You want to escalate the traffic jams and I want to eliminate them. Look who is in the traffic jams and you will see that it is the jobs I want to automate. Stop fighting wars and start building better homes and services with the manpower and you wont have any wars to fight. Stop following the idiots that have led you to this

state of global complexity and chaos. You cannot stop the terrorists until you are practicing what you preach. Jesus stood against the very same things that the terrorists are targeting, moneychangers, gamblers, liars, cheaters, thieves and salesman. You can hardly find a leader who has not been involved in corruption and the system is to blame not the person. A good system is not corruptable, which is what I am trying to lead you into. Yes I am the only one going the other way but that does not mean I am wrong. I have been going the other way my whole life, its the secret to my success.

What things have I done that you cannot. I have fixed hundreds of problems in work areas that no one else could or did and I can and have eliminated work place injuries that were once very common. I also do very well as a mediator between companies and unions who were at war for years before my arrival. I changed more operating systems in a company of 30,000 than all others combined. Either I was the only one who cared enough to solve the ongoing problems and inefficiencies or I was just the smartest, either way. I dont care much for the current economic system so if you are trying to teach it to me and justify it then your argument is a waste of time. I set my head on my desk and objected to the sales and middleman system when I was 14. Everyone knows that this system must come to an end to achieve peace and prosperity. I just put forth the starting point of no ownership with efficiency, resourcefulness and justice for all. Equal rights regardless of where you were born. And get simple like educating over the internet instead of sending children to school. Its a lot cheaper to hook them up with an on-

line computer and let them view the lesson plan at home. Limit web access until they take the lesson first. Learn at your own speed and when you are ready to learn. This Monday thru Friday 9 to 5 world has to change to 24/7/365. Get rid of the holidays and utilize the night and weekend hours just like the rest of the hours of the week.

Sorry I posted inside of quotes I dont know how to use the function of reply with quote, I am new at this stuff. I have nothing to hide but my life has been hidden which is why it is not as easy to define what I have done as you wish it were. I wish it were easy but that is not how my life has been and it was hidden so that I would be here saying what I am based on facts.

The short list of minor to major leadership experiences was just a demonstration of how quickly I am assigned to leadership roles. And it was a demonstration of how quickly I adapt from one area to another and do the same things that worked perfectly everywhere I went. If my siblings are the best in the state at several sports you might think we have a gift. We compete at very high levels of sport and life, unlike any other family of children that I ever heard of.

First of all if you are "titleing me" democratically in another thread. I will not post under some comical or derogatory title. I know what systems have been tried and failed before, but the system you used was not globalized as it needs to be in order to work and we did not have the technology that we have today to support a more efficient system. I just want to take the waste out of the system and ownership and indirect trade is super wasteful. We dont need the middlemen anymore but we sure need more help with environ-

mental clean up. We have developed what is needed to jump into a different way of life, which is to manage the planet efficiently. We dont have the manpower to replace inefficient systems but we have plenty of people haggling over prices. I say materials are free its only the labor that you should be paid for. Ship products direct when you can and produce them in an environmentally sound manner. Stop building junk just so you have something to sell and stop trying to make a profit.

My accomplishments: 21 years as a production manager for Wonder bread and Hostess cake in Buffalo, Natick Ma. and Cleveland and technical and engineering advise to Philladelphia Pa and East Brunswick NJ. Many of the operating systems used nationally were designed by me. I probably redesigned more work areas than all other employees combined. The production numbers I left behind were astounding. I eliminated union vs management disputes and accidents as well as increased efficiency by about 20 percent. I probably fixed about a thousand problems that no one else could and I used many systems that were never tried before and some that had tried and failed before and my systems improved the operation every time without fail.

I also finished last in my high school class of 450 because I slept through the education that was being taught on purpose with purpose. I don't need your education to solve the problems that you cannot. Its common sense that I use and every automation project (about 12) was approved by the general office and was a success.

The prophesy that I lived was just as the bible said I would live. What proof would you like to see? I can fax a court doc that clearly outlines my de-

fiant stand against the Commonwealth of Massachusetts. It was a biblical trial at the millenium just as predicted and I did exactly what the bible said that I would. Sworded tongue verses your best judges and district attorneys in 2 trials on both sides of 2000 and I tore them apart as a defendant. I denied nothing that they said that I did, in fact I verified it and defended it. No one has ever waged a war like I did against your way of life.

I will get some court docs scanned and try and post them. You are right any 15 year old can do this but I am 50 and did not learn how to do this stuff. You are right that I worked in the Twinkie factories and I was a Production Superintendent who also fixed or directed the repair of all machines and systems. I dont even have a college degree and they wanted me to manage the largest facilities. I must be a dummy, and they just overlooked the college grads with masters degrees. What I do is reduce stress which is Americas silent killer. What I did everywhere I went was solve the problems that the union and the company was upset with and no one ever complained again. The chaos and stress went away and peace and prosperity remained. Yes I recommend Communism and just because an idiot and a murderer tried it once before and failed does not mean its not the way. The way you do business causes all of the stress and wars. Stats like 9 out of 10 small businesses fail in the first 5 years and over 200,000 people dying in the work places of China per year as well as 70 percent divorce rate among Christians speaks load and clear of the success of Capitalism. Only with superior weapons can you spread such a vicious sytem to the world. The US is the worlds largest polluter and re-

source user and you want me to understand and support your economic systems. Your systems are manpower and resource inefficient which is what all industries try and eliminate. Your systems require gambling and corruption to run them, such as the stock market, lotteries, casinos and sports betting. Get real you are the anti christ and I dont care how your system works because I would never endorse that which causes this. Resourses are scarce because you manage them poorly nothing more. I don't have enough lobsters to go around but if you farm them we will have far more than we do now. I want my title changed to "The Messiah" which is who I am. I could probably do it myself but again I do not have education in that field either.

I scanned some court docs to a disk but I only know how to attach to emails. If someone wants it emailed to them I will do it or tell me how to attach to here. The Commonwealth of Massachusetts fears me like no other in all of time and they cannot stop me from talking and writing what I do. They had many doctors look at me and none found me to be delusional, just one more thing that blew up in their face. I am not here just to have fun I am here to change the world into utopia and that is a long way from where it is. It is something I have done many times before on a much smaller scale. The only thing I am trying to stress is the point that ownership of resorses needs to be collective as in a share of everything for everyone. No more lines on the map and basics free of charge. If that is Socialism or Communism or a combination of many systems then that is what it is. Each time you restrict me from a water supply because you want to sell it to me you start a war. It

is mine and you have no right to prevent me from access to basic human needs. I already see that the world is not on one system because you dont agree on which one is best. Get fair and simple and it takes far less manpower to run this world in an organised and environmentally friendly manner. I see protests and wars going on every day in every land and some of you seem to think that is ok or normal. Get real this world is headed for disaster in every area. And for those of you that think you can defeat me, forget it I have taken on the worlds best lawyers, judges and businessmen and they lost every step of the way many times. I have a tough time answering all of your questions with the time that I have and the vulgar remarks and insults just turn me off pretty quick. The war machines that you use to control the world must be eliminated.

Surelethe,

Thank you for the tutorial I will use the imaging system and post soon and I will try and use the quote thing properly. The simple system that I used to correct the problems of the worlds largest baked goods manufacturer and distributor are similar to the problems of the world. Plain and simple problem solving and automation that eliminated stress, accidents, and waste. Not to mention the increased capacity and efficiency with which it operated. That is what needs to be accomplished to achieve peace in the world. You order it and I send it, unless I cannot make enough at which time, I must increase my capability and tell you when you will get what you ask for. And if I cannot fill all the orders it becomes a luxury due to limited resources. All that I ask is that you send the manpower and resources I ask for to supply your

requests. You can democratically oversee every operation with elected professionals that distribute in the most efficient way possible. I cannot stand by and watch salesman burn up energy and resources when products can be demonstrated online. And transporting children to schools for basic education that can be done at home over the internet is wasteful. Socialize your children at the playground not when they are trying to learn. The signs and advertisements alone are a poison to the well being of the human mind, not to mention the alarm clocks and busy schedules that people are on. Set prices and wages globally and give the basics away for free its easier and it reduces crime dramatically. Cut through the red tape and middlemen and the stress level goes way down along with pollution. I need forests managed and beaches life guarded not liers cheaters, theives and gamblers telling me how much a product will cost me today. Stop building weapons to kill each other and build infrastructure that serves each other.

Just because something was tried and failed does not mean the circumstances have not changed and whatever you do it must be global to work. All of us want the same things and I have yet to get a complaint from a person who worked for me in the 30 years that I have been a leader. I treat people with respect and I never ask them to do something that I would find objectionable to do myself. I don't work hard, I work smart, I just did it at a level that was hidden from sight. Forbes magazine has no idea what goes on inside companies because it is proprietary information. I was not interested in getting credit for what I did, I was hiding. It was a demonstration of how simple it is to solve ongoing problems in

an environment that had been plagued with them. I had plenty of wars and dragons to defeat and it was a pleasure to do it without anyone getting hurt. The same can be done with the holy war that is expected to last forever. I suggest you unite this world and I don't think it takes very long to do it. I am very pleased with what the US has done in the area of technology and infrastructure its the method of how it was done that needs to be changed. The invention war is over, we have what we need to make a better system work, and that will lead to even more inventions. Its just a redistribution of labor and standardizing the use of resources. If you don't make everyone happy your system does not work properly and all of my simple systems worked properly. The world systems are way too complicated and they need tremendous support as a result. get simple and you will work far less and never complain again.

I totally appreciate the technology that the US has developed, but it has been a blood bath to get here which is what needs to stop. I think the number is 65 percent of the US federal budget is for defense spending and I say the lines on the map are illegal and inefficient. Spend your labor on good things like helping your neighbor not killing those who stand against the destruction you leave in your wake. If you don't think the internet is a better place to demonstrate a product you are nuts. I don't want to negotiate the price of anything and I want its value to remain the same barring shortages of materials and transportation expenses. If you want something that is manufactured on the other side of the earth then transportation fees increase the cost of the item. I worked 1978-1980

in Buffalo, 1980 -1988 in Natick Ma. 1988-1991 Cleveland 1991 -2000 Natick Ma. and I worked temporary assignments in Philadelphia Pa., Biddeford Me, and East Brunswick NJ. The only computer skills I needed were accounting, payroll, word processing and simple CAD programs that I used to redesign many work areas. I sent some stuff to Snuggly Swimmer Babe's email because as a hotmail customer the web host Surelth sent me to won't handle hotmail accounts. I was the only internal problem solver dedicated to that task that I know of in that company and I solved every problem I faced very quickly. China has 250,000 work place deaths per year and 70-90 percent of all dr visits in the US are due to stress. I had a similar environments and eliminated the injuries and the stress. I play a simple game and the results are miraculous. That same simple game can be applied to the world and the results would be the same. And I had no help other than the engineering firms and internal engineers who developed the systems that I designed. This world creates problems faster than it solves them which is a problem that I overcame. I need to clean up the traffic jams and waste that has been left behind by the greedy systems that brought us the technology we needed to change the way we live. I thank you but I cannot let you continue on the path that you are on, without trying to stop you. Live by the sword, die by the sword and this world builds and uses bigger swords every day.

Lord Zentei,

Did you get what I sent you? I did get an automated response that said you did not get scan 10. Snuggly swimmer babe should have got it too.

Twinkies and bread are food basics

in the US and although other foods may be more nutritious that does not make them bad for you. I don't suggest you to drink 10 beers a day but you can live off it (I think). I think handing out loaves of bread makes more sense that handing out sacks of wheat.

And as far as the stock value of the company during my time. I can only control what I am in charge of and the facilities I ran kept that company in business. The problem was each time I made improvements, the CEO took them in his paycheck and the people who lost their jobs had to look elsewhere for work. The stock market is the most worthless use of manpower I have ever seen. Its a gambling casino nothing more and those are popping up everywhere just to keep the economy running. Hope, risk, stress, luck, corruption and grand theft is what the stock market is.

I may only have 16 posts but I post other places as well and its all the time that I have. Why are so many people standing behind this way of life when you know it does not work properly? When I look at the fruit of the tree this system is growing, its scary and I wont eat it. Swords to plowshares is my quest and has been since I was a little boy. Each time I or someone else gets threatened, I fight back with words and wisdom and I have yet to lose. Some people are looking for a better way others are content with the wars that rage on.

I set up a photobucket account last week but I did not try and use it due to the notice about hotmail users now my password does not work and I asked for a confirmation of it. I will try again tomorrow. I sent attachments to Lord Zentei and Snuggly Swimmer Babe via email again.

And the really cool dude in all the armour does not even come close to who I am. His armour and sword is heavy and mine is very light. Your Golliath wears himself out very quickly which is why he was no match for David. I take on your armoured warriors with my bare hands all the time and they never win. Just how many ICBM's does the world have pointed at each other? And how many people are in jail? And how many countries are at war? And the list goes on and on.

And if you think that managing an operation the size of the ones I had was easy you are wrong. Many tried to manage those operations before me and failed. I consider myself the most successful person in the history of that company and I did not even have to cheat like most of the managers did. Its the same thing in all of your systems, corruption and incompetence and abuse of manpower and materials.

I specialize in manpower reductions and efficiency improvements and I want to do it to all of your systems so I can have the manpower available to do the things that do not get done. Parental child care and environmental clean up is high on my priority list, but does not even seem to be on yours. You may think the middleman is important but I think it is a waste of manpower and resources. Your systems make a mess and don't even clean it up. I hear you say resources are scarce, only because you missuse them with the same system you have been using since the beginning of time.

And when will there be a spell check in this forum? What do I look like a spelling bee and grammer champ? I stand for the use of technology without the borders of royalties.

I did not get fired, I accepted a sep-

aration instead of a 4th relocation. I was asked on many occasions to accept a promotion and continue with the company. But I cannot talk like this and work for them.

I have tried with photobucket but I NEVER GET AN AUTHORIZATION CODE BACK VIA EMAIL, I sent them a message and tried to find out if they are blocked from hotmail which they say they are or might be. I checked my junk file and they are not in it. Yes I know that I am lowsey at this stuff, I apoligize. Maybe I will switch to Yahoo if hotmail is the lower level of ability that I hear it is.

I fight wars in different ways, not with weapons but with the mind. And yes I am in a different dimension that can be difficult to understand. I see the problems you deal with as things that need to be permanently corrected and your system never does such a thing. The traffic jams alone should be enough to make you realize that your system is lowsey.

Now that is a suit of armour and a weapon of mass construction. My wars have been against the judicial system, the educational system, the Marine Corps and every child abuser and environmental destroyer I could find in the business world. I did not hurt anyone with a weapon as you do, I helped them by showing them another way. I dont do crazy things just for kicks, it is a chess match and I have Satan in check mate when you stand behind me. Focus on what I tell you to and you will win every time as I have.

My ways are not your ways and the true meaning of what went on in the 4 courtrooms and countless hearings is only eluded to in this brief summary of one of 2 trials in the months on both sides of the millenium. Prophecy is a

crazy thing to have follow you through life and this was no exception. My demonstrtations in life have all been along these lines of outrageousness. If I say that I can, don't bet against me. I can fix this planet and every human problem that exists. It takes global unity in a kind and giving system and you can convert to it in a minute.

The states best mental health specialists had plenty of opportunity to try and prove me to be unstable, delusional or anything else. They testified and even froze and could say nothing when asked if my thought process was delusional. A witnesses and a judge even cried when discussing the facts of the case. I controlled the court rooms in many ways just by what I had done to get there. All of my life people have said wow look at what Jim can do. I live in a different dimension and my ways are strange but the results are miraculous and always have been.

You knew the messiah would be different and you knew he would judge your judges. That trial is just one of many that I have been through and I always win on every point of view. When I am threatened as I was I always throw a big punch as quick as possible but it is never intended to hurt anyone physically. I stand against your leaders and systems and I was in court many times before parking my chariot in front of a toubn and stepping forward. Judges and police officers cry when they get their butt kicked by a man they wish they could find to be delusional but they cannot. I stand down to no one and never have.

This mentally stable and extremely gifted man according to mental health professionals and businesses and athletic records has won almost every competition he has ever entered. I am a

50 yr old that is the one to watch on a snoboard and the one with the big tennis game. Football, baseball, golf, tennis, volleyball, karate and you name it someone in my family has a trophy for the sport or is terrific at it. We are not average people we are extremely capable, beyond what you see on television in every way. Even if you think that I am nuts as many though Jesus was. the miracles I performed at the bakery were things no man could have achieved. You don't look at things the way I do and so you do not lead as I do. At 43 when in jail for 2 weeks, I dominated in football as the QB, slaughtered the chess champ and won 90 percent of the basketball shooting contests. And I did several extremely long hand stands just for kicks. My 3 sisters are some of the most successful women in the world. And my brothers are the best athletes and musicians you have ever seen. I would find it highly unlikely that you can find a smarter man than my father. My mother looks like princess Grace of Monaco and my 3 sisters in thier 40's might win the Ms America contest. Call me a quack all you want but I know where the winners circle is even when I stand against all of you.

Surlethe

Is right about one thing its your leadership and systems that are incompetent which is what I have been saying since I was 12. My competency goes way beyond anyones that has ever walked this earth and that is proven by the results of my leadership not the court cases that came before and after what I did. I stepped forward with the bow to reveal who I was in the best way possible and you saw nothing even though it happened at the millenium. If you are waiting for someone to lead

you in the same direction to find peace, it cannot be done.

I can see that you like the direction that leads you so hang in there I have better things to do than be insulted. And go to Messiah.org for a more professionally written opinion of your systems and leadership. I am the star you wish to destroy, but you cannot. Trekies your all the same. Jake99@hotmail.com

2 of my brothers would compete very well with Aggassi at the college level and they both had bigger serves. My other brother is the best ping pong player I ever saw. The trophies from my siblings and I go from little league to college to ametuer tournaments and many are significant silver bowls. Tennis, racquet ball, squash, platform tennis, golf, archery, bicycles, volleyball, karate, billiards, football, baseball, diving and probably many more that I am not aware of. We play every sport at a high level but we only have time to compete at a few. If you are looking for the best chess players, top 10 college grads, most likely to succeed, most successful or the best rock and roll musicians again pick from my family. My sister won the Boston Globe award for most valuable high school volleyball player in the state and shes only 5'8". None of your athletes compete at the level that we do. Mark Magwire may hit bigger home runs but not by much and we do it on a balanced diet not steroids. The only reason I have trouble posting here is the vulgarity, if you dont like what I talk about please leave and find something better to do. George Bush kills to solve problems, which just get worse every day, I just solve problems without killing and I succeed every time. I hear he was a cheerleader and he has never run a business. I say he is a coward and an idiot.

I did not have time to read all of this but I did find it interesting and I will read the rest on Monday. Keep the language clean and I will stay and as you say amuse you. Funny the world is not that amusing and you are supporting its ways.

I say he stays
